

Storm Data and Unusual Weather Phenomena - December 2013

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

IOWA, Northeast

(IA-Z030) CLAYTON

12/22/13 00:15 CST	0	Heavy Snow
12/22/13 09:15 CST	0	

A strong area of low pressure moved out of the Southern Plains into the Ohio River Valley from December 21st through the 22nd. Heavy snow on the northwest side of this system fell over a small part of northeast Iowa with a band of 6 inches falling across the southern sections of Clayton County. The highest reported totals from Clayton County were 6 inches in Edgewood and Guttenberg.

WISCONSIN, Southwest

(WI-Z032) BUFFALO, (WI-Z033) TREMPLEAU, (WI-Z034) JACKSON

12/01/13 00:00 CST	0	Drought
12/31/13 23:59 CST	0	

No changes occurred during December, 2013 to the severe drought across western Wisconsin. Because the ground was frozen, no moisture from the 10 to 20 inches of snow that fell was able to work into the soil. As a result, the severe drought continued across the northern portions of Buffalo and Trempealeau Counties into the northwest corner of Jackson County.

(WI-Z043) JUNEAU, (WI-Z044) ADAMS, (WI-Z055) RICHLAND, (WI-Z061) GRANT

12/22/13 00:15 CST	0	Heavy Snow
12/22/13 11:00 CST	0	

A strong area of low pressure moved out of the Southern Plains into the Ohio River Valley from December 21st through the 22nd. Heavy snow on the northwest side of this system fell over parts of southwest into central Wisconsin. A band of 6 to 8 inches fell across Grant and Richland Counties into the southern sections of Adams and Juneau Counties. The highest reported total was 7.8 inches in Fennimore (Grant County).
